

# Village of River Grove

## Water Service Line Material Inventory

---

Status: Initial Draft - Active <sup>[1]</sup>

Last Updated: 7/29/2022

---

In compliance with Illinois Public Act 102-0613, Owners and operators of community water supplies are required to develop, implement, and maintain a comprehensive water service line material inventory and a comprehensive lead service line replacement plan, and must provide notice to occupants of potentially affected buildings. As the Public Act does not require unearthing of any service lines for the sole purpose of inventorying, most service line material was identified at the point of entry to the building <sup>[2]</sup>. This data was gathered in a recent Meter Replacement and Upgrade Program.

### Summary of Service Lines

Type	Number of Services
Copper	560
Galvanized	238
Iron	69
Lead	1738
Lead & Copper	3
Plastic	1
Unknown	4
<b>Total</b>	<b>2613</b>

---

Pipe Type:
C = Copper    G = Galvanized <sup>[3]</sup> I = Iron    L = Lead
L/C = Combination of lead from water main to curb stop / Copper from curb stop to meter
C/L = Combination of copper from water main to curb stop / Lead from curb stop to water meter
P = Plastic or PVC    U = Unknown

### Notes

---

[1] Some water services may still be under review in determining material type.

[2] In some cases, the preceding service material may be different than what is visibly protruding into the building.

[3] Galvanized service lines typically in the Village, but not in all cases are preceded by a lead type service.

---
